

Completely self-contained portable point-of-sale featuring the IBM AnyPlace Kiosk

Built around the industry leading, retail hardened IBM AnyPlace Kiosk and featuring American Transportation Association (ATA) designed cases, Macro Solutions Group has provided your enterprise with the solution of point-of-sale mobility that can go where your stores go. Perfect for sidewalk sales, exhibits and conference retailing, pop-up and temporary stores - this hardware combination allows full function point-of-sale applications wherever you can find an electrical outlet. Our dual case solution also reduces each individual case weight to less than 40 lbs, making them easy to handle. Single case solutions are also available, and we can customize the case(s) and/or internal hardware to meet any requirements.

Macro Solutions Group, LLC was founded in 2002 to provide IT infrastructure support, and installation services - with a primary emphasis on solutions for retail enterprises. Our principles each have over 12 years of experience designing, implementing, and providing service & support for point-of-sale systems, kiosks, and other store systems.

We offer a full line of point-of-sale products from a variety of manufacturers.

IBM AnyPlace Kiosk

- Robust Design
- Easy Serviceability
- Energy Savings
- Cost-effective

Point-of-sale flexibility improves efficiency

The new AnyPlace POS Hub feature provides outstanding versatility in fast-paced retail locations. To extend POS (point of sale) capabilities, IBM offers this optional AnyPlace POS Hub that works with any of the AnyPlace Kiosk models. It has five Powered USB ports, a cash drawer port and a lengthy USB cable that connects to an AnyPlace Kiosk. Powered USB ports, built on IBM innovation and industry standards, allow staff to quickly attach high-speed peripherals without requiring multiple, bulky power supplies. Now you can locate POS capability wherever it is needed.

Leading wireless capability drives mobility

Mobility is a key feature of the IBM self-service solutions. The performance AnyPlace Kiosk units contain an ExpressCard™ slot to insert expansion cards like wireless WAN third-party options, which deliver business flexibility to connect and interact with consumers in a wide variety of environments. ExpressCard™ is a new industry standard expansion slot that enables high-speed peripherals in a compact form factor.
